2.1. Deliverable Regulatory Framework	4
<b>3. Results.....</b>	<b>5</b>
3.1. List of regulatory frameworks	5
<b>4. Concluding remarks .....</b>	<b>7</b>
<b>5. Annex: List of Regulatory Framework .....</b>	<b>8</b>

## 1. Introduction

This task aims at preparing the roll-out of project deliverables at national and regional levels with the relevant governmental and sectoral authorities. The regulatory framework will be studied to make sure that the strategy can be implemented locally.

## 2. Methodology

CONFAGRI PT has designed a common structure, sent in M15 (March 2021), in order to support partners in providing information on the regulatory frameworks in place in each country and region, according to the distribution set in Table 1.

**Table 1. FIELDS Regulatory Framework - partners contributions**

Partners	European Regulatory Framework
FDE	Contribute to provide EU regulatory frameworks
CEPI, EFVET and LLL-P	Provide EU regulatory frameworks
FENACORE	Contribute with EU and Spain regulatory framework for water sustainability and reuse
Partners	Provide regulatory framework of the following countries:
SCOOP, FIAB	Spain
GAIA EPICHEIREIN	Greece
UHOH	Germany
LVA, AP, FJ-BLT	Austria
ANIA, AC3A	France
AERES, WUR	Holland
CONFAGRI PT	Portugal
ICOS	Ireland
CONFAGRI, INFOR	Italy
GZS	Slovenia

CONFAGRI PT integrated the information received from the partners in M21. Some information about these lists will be included in D2.4. The regulatory framework list D5.1 will also be uploaded into the platform (M24).

## 2.1. Deliverable Regulatory Framework

The Regulatory Framework deliverable intends to collect existing information on specific legislation for training, as well as other legislation that will be considered relevant to the main areas of impact of the project (sustainability, digitalization and the bioeconomy in agriculture), taking into consideration the foreseeable future needs for skills in these areas.

A database for the Regulatory Frameworks was created in the FIELDS platform (<http://www.erasmus-fields.eu/management>). All involved partners uploaded the relevant information related to their domain in two phases: a first phase till the end of August 2021 and, then, a second phase till November 2021, revising the information inserted.

This collection was organised through a table that included thirteen columns for collecting basic information, related with the specific Regulation for training:

1. **Organisation** (combo box) – The partner that fills the fields
2. **Document Reference** – The name of the regulation in its native language
3. **Doc\_Type** – Document type, **in English**, for example, EU law (treaties, legal acts, consolidated texts, international agreements, preparatory documents, summaries of EU legislation), EU case-law (case law, digital reports), national law or regulation etc.
4. **Framework** (combo box) - Theme of the regulation (Training / Bioeconomy / Sustainability / Digitalisation)
5. **Country** – Which country or geographic area the information refers to
6. **Keywords** related with the information, including the topics of the trends identified in D 1.8, such as Climate Change, Water management, Integrated Pest Management, Organic farming, Biodiversity, Fertilisers, Forestry, Waste management, Animal Welfare, Renewable Energy, Bioenergy, Energy consumption, Packaging, Food Traceability, Food regulations, Technology (robot, drone, etc.), Logistics, E-commerce, E-marketing
7. **Date** – Publication date of the document
8. **Summary** – Synthesis of the regulation
9. **Application** – National, Regional, EU or other
10. **Entry force** – Date of the documents' entry into force
11. **Language** – Language available of the document (English and/or others)

12. **Link** – Link to the document

13. **Comments** – Any observations the partner wishes to add, besides the information filled in the “Summary” column, that can relate the document with the scoop of the project.

**Example of filling in the table “Decree-Law No. 14/2017, which frames the national qualifications system in Portugal”**

Organisation	Doc_Reference	Doc_Type	Framework	Country	Keywords	Date
CONFAGRI PT	Decreto-Lei n.º 14/2017	Decree-Law	Training	Portugal	Training, National Qualifications System	26/01/2017

Summary	Application	Entry Force	Language	Link	Comments
Changes the legal system of the National Qualifications System and defines the structures that ensure its operation	National	27/01/2017	PT	<a href="https://dre.pt/home/-/dre/105808927/details/maximized">https://dre.pt/home/-/dre/105808927/details/maximized</a>	--

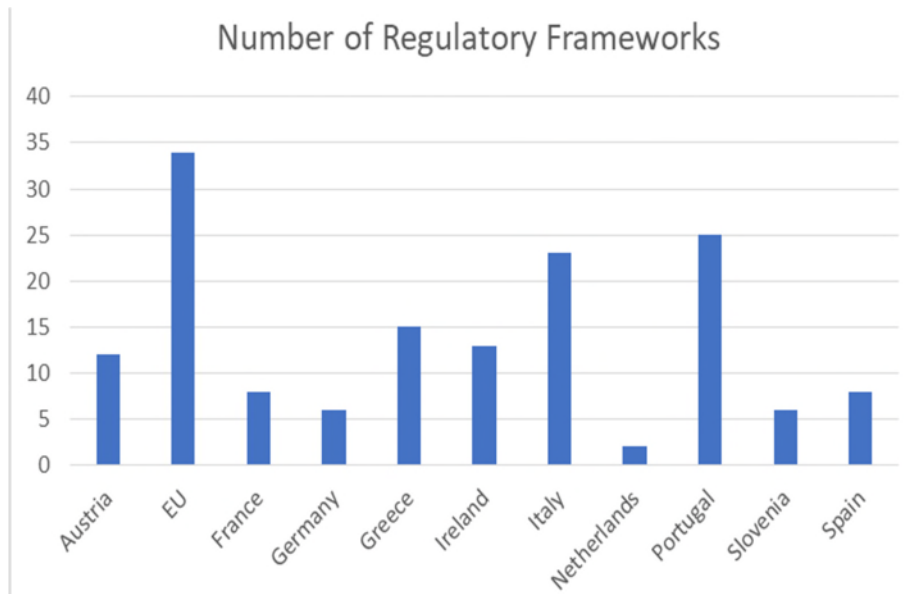

## 3. Results

### 3.1. List of regulatory frameworks

The List of Regulatory Frameworks includes 152 entries, 22% of which refer to EU initiatives and the others constitute national or regional regulatory frameworks from 10 countries (Austria, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain), as shown in the Graph 1.

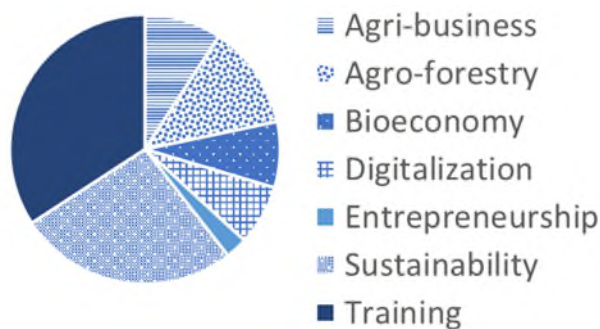

Although each partner was incentivised to compare the entries on the regulatory framework identified by other partners, in order to check if there was any other framework to add for its own country, in the final list it is clear that some opted for just listing the big baseline frameworks while others included additional frameworks considered important. One country may have a number of regulatory frameworks

bundled together in one big framework. Another country might have the same frameworks listed separate.

**Graph 1 - Number of Regulatory Frameworks identified by territory (EU and countries)**

The Categories “Training” (52) and “Sustainability” (40) were the most listed among the regulatory frameworks identified (Graph 2) and most of the regulatory frameworks listed are of national application (102).

**Graph 2 - Number of Regulatory Frameworks identified by Theme**

Italy is the country with the most regional regulatory framework identified (12 out of 16) in four themes (Agri-business, Bioeconomy, Sustainability and Training).

---

## 4. Concluding remarks

The list of regulatory frameworks identified is a work in progress, as new legislation still can come into force during the rest of the duration of the project. Partners are incentivised to update the list. However, it is already an important baseline tool that can be useful for future project tasks / activities. It can be used, p.e., to compare what is set in each country and that could be also important in other(s), to identify any European / country framework that is missing or can be proposed.

The regulatory framework may help to identify gaps in training areas that can be proposed for future projects.

## 5. Annex: List of Regulatory Framework

Below, the tables summarise the legal frameworks indicated per territory (country or EU) (Table A1) and type of framework (Table A2).

At the end, all regulatory frameworks identified by the partners are listed, by indicating the information described in subsection 2.1 (Table A3).

**Table A1. FIELDS Regulatory Framework per territory**

<b>Territory</b>	<b>Number</b>
<b>Austria</b>	12

33	Communication on the European Skills Agenda for sustainable competitiveness, social fairness and resilience (COM(2020) 274 final)	Communication	Training	EU	Education, training, VET	01/07/2020	Aims to ensure that the right to training and lifelong learning becomes a reality all across Europe. The Agenda was structured following 5 building blocks and 12 major action points. The blocks are: 1) Working together under a Pact for Skills, 2) Skilling for a job: aligning policies to deliver results, 3) Developing tools that empower people to build skills throughout life, 4) Setting ambitious skills objectives and 5) Making it happen: unlocking investment. Every building block has specific actions assigned to them except building block 4. This block focuses on the quantitative objectives for upskilling and reskilling to be achieved within the next 5 years.	European Union	01/07/2020	English	<a href="#">Link</a>	
34	Recommendations on the establishment of the European Qualifications Framework for lifelong learning (2008/C 111/01)	Recommendations	Training	EU	Education, training, Qualifications, EQF	23/04/2008	The European Qualifications Framework (EQF) is a reference framework that helps communication and comparison between qualifications systems in Europe. Structured in 8 levels where 1 presents the lowest level of proficiency and 8 the highest, these reference levels are described in terms of learning outcomes: knowledge, skills and competences. This allows any national qualification systems - national qualifications frameworks (NQFs)- in Europe to relate to the EQF levels.	European Union	23/04/2008	English	<a href="#">Link</a>

35	European Skills, Competences, Qualifications and Occupations	EU Classification	Training	EU	Classification, skills, competences, qualifications, occupations, ESCO	28/07/2017	ESCO describes, identifies and classifies professional occupations, skills, and qualifications relevant for the EU labour market and education and training. One of ESCO's main missions is to build stronger bridges between the world of education and training and the world of work, contributing to reducing skill mismatches and supporting the better functioning of the labour market. The vision behind ESCO is the provision of a common reference language that could support transparency, translation, comparison, identification and analysis of the content of a qualification, thus helping to indicate how those relate to the skills and occupations needed across occupations and sectors.	European Union	28/07/2017	English	<a href="#">Link</a>	
36	Recommendations on key competences for lifelong learning (2018/C 189/01)	Recommendations	Training	EU	competences, lifelong learning, education, training	22/05/2018	Provides a common European reference framework on key competences for policymakers, education and training providers, social partners and learners themselves. It also presents successful ways to promote competence development through innovative learning approaches, assessment methods and support for educational staff. It identifies eight key competences needed for personal fulfilment, a healthy and sustainable lifestyle, employability, active citizenship	European Union	22/05/2018	English	<a href="#">Link</a>

44	Communication on EU Biodiversity Strategy for 2030 Bringing nature back into our lives	Communication	Sustainability	EU	biodiversity, climate change	20/05/2020	Aims to put Europe's biodiversity on the path to recovery by 2030 for the benefit of people, climate and the planet. In the post-COVID-19 context, the strategy aims to build our societies' resilience to future threats such as: the impacts of climate change, forest fires, food insecurity and disease outbreaks - including by protecting wildlife and fighting illegal wildlife trade. The strategy contains 4 specific commitments and actions to be delivered by 2030: 1) Establishing a larger EU-wide network of protected areas on land and at sea, 2) Launching an EU nature restoration plan, 3) Introducing measures to enable the necessary transformative change and 4) to tackle the global biodiversity challenge. 58	LAW 11/2021 on the recovery of agricultural land in Galicia	Regional regulation	Sustainability	Spain	Land management, farm management	21/05 /2021	Aims to recover Galicia's agricultural land for agricultural, livestock and forestry use, without limiting itself to stating these values in generic terms, but rather they form a fundamental part of the measures and proposals contained in its articles. Thus, support for agricultural activity and the income of family farms, especially women farmers, the promotion of the application of agricultural practises that contribute to the maintenance of ecosystems and increase the capacity to adapt to climate change, the promotion of sustainable and active forest management and the fight against the degradation and abandonment of agricultural soils are both cross-cutting issues present in the law and fundamental axes of the European Green Pact, especially of the "Farm to Fork" strategy included in it, as well as of the Climate Action and the new EU Forestry Strategy.	Regional	22/05 /2021	Spanish	<a href="#">Link</a>	

59	LAW n° 2018-771 of 5 September 2018 for the freedom to choose one's professional future	National regulation	Training	France	Regulation, training framework, training tools, training actors, professional training	29/07 /2021	Aims to reform the system of initial (apprenticeship) and continuing vocational training as well as the functioning of unemployment insurance. The law reforms the personal training account (CPF), which will no longer be funded in hours, but in euros. The account will be credited with 500 € per year for full-time employees, 800 € for unskilled employees, up to a limit of 5,000 € and 8,000 € for unskilled employees. A digital application will be created to find out in real time about individual rights acquired under the personal training account and to choose a training course. A civic commitment account will be set up with the aim of identifying and enhancing the value of civic commitment activities and thus acquiring training rights. 62	Bioeconomy Strategy	National Strategy	Bioeconomy	France	Bioeconomy, development of bioeconomy, sustainable development	18/01/2017	In order to support the development of the bioeconomy, this is the result of work carried out by the ministries in charge of agriculture, the environment, the economy and research, as well as contributions from all stakeholders (upstream and downstream economic players, public institutions, researchers, civil society, etc.). This Strategy defines a framework for the sustainable development of the bioeconomy, consistent with our territory's resources and needs, while avoiding any overexploitation. This plan sets out the strategy in action, in order to deploy the bioeconomy operationally on French territory from 2018 to 2020. In 2018, it has focused on the non-food part of the bioeconomy. It does not deal with the food use of biomass, which is already the subject of specific policies.	National	18/01/2017	French	<a href="#">Link</a>	
63	Law No. 2018-938 for balanced trade relations in the agricultural and food sector and healthy, sustainable food accessible to all (EGALIM)	National regulation	Agri-business	France	food waste, sustainable consumption, food traceability, food regulation, logistics	30/10/2018	This, commonly referred to as the "Food Law" or the "EGalim Law", is a French law resulting from the General Assembly on Food, launched in 2017, bringing together civil society - consumers, agri-food industrialists, large-scale retailers and the public authorities. It aims to re-establish a balance in the commercial relations between producers and retailers and to make healthy and sustainable food accessible to all consumers. 64	The anti-waste law for a circular economy	National regulation	Sustainability	France	Sustainability, food regulation, food waste reduction, circular economy, recyclability, plastic,	10/02 /2020	The anti-waste law for a circular economy aims to accelerate the change of production and consumption model in order to limit waste and preserve natural resources, biodiversity and the climate. Transforming our system in depth: this is the objective of the anti-waste law for a circular economy, whose 130 articles make it possible to fight against all the different forms of waste. The law aims to transform our linear economy, produce, consume, throw away, into a circular economy. It is divided into five main areas: get rid of disposable plastic; better consumer information on solidarity-based waste and re-use; act against programmed obsolescence; better production. It sets new objectives for the years to come. The law provides for an end to the marketing of single-use plastic packaging by 2040. To achieve this, reduction, reuse and recycling targets will be set by decree.	National	01/01 /2021	French	<a href="#">Link</a>

							the coordination between vocational education and education, and for a coherent decision-making in the field of education, the allocation of powers to the national government, to the municipalities, to the national bodies and to the institutions should be revised.					
112	Wet educatie hoger onderwijs en wetenschappelijk onderzoek	National law	Training	Netherlands	National law, education, higher education, research	03/07 /2021	With a view to strengthening the quality, innovative capacity and social orientation of the system of higher education and scientific research, it is important to increase the autonomy of the institutions and, to this end, to review the allocation of powers between the central government and the institutions concerned. In addition, it is desirable that the administrative relations between the central government and the institutions be as harmonised as possible. It is therefore desirable to merge the separate regulations in the area of the system of higher education and scientific research into one Act on Higher Education and Scientific Research. 113	RAZISKOVALNA IN INOVACIJSKA STRATEGIJA SLOVENIJE RISS 2021 – 2030	legal act in preparation	Sustainability	Slovenia	SLOVENIA'S RESEARCH AND INNOVATION STRATEGY	05/07 /2021	The mission of research and innovation activities is to systematically develop new knowledge and its use for sustainable development, improving the quality of life and the well-being of all. By 2030, Slovenia will develop into a successful knowledge-based and innovation-based society and is ranked in the top ten countries on the scale of the European Innovation Index. The scientific research and innovation system will be firmly integrated into the European Research Area, which will actively co-create and involve all stakeholders in a system that responds to societal challenges. The reputation and attractiveness of the profession of researchers will increase, and by investing in advanced and internationally competitive research infrastructure, Slovenia will become an attractive destination for foreign researchers. DIGITAL SLOVENIA 2020 - Development strategy for the information society until 2020 is an umbrella strategy determining the key strategic development orientations and uniting the strategies in a uniform strategic development framework. The DIGITAL SLOVENIA strategy is a commitment for a faster development of the digital society and the use of opportunities enabled by information and communication technologies and the internet for general economic and social benefits. Along with the strategies from its scope, it envisages measures to tackle the major development gaps in the field of digital society: faster development of digital entrepreneurship, increased competitiveness of the ICT industry, overall digitisation, development of digital infrastructure, construction of broadband infrastructure, strengthened cybersecurity and the development of an inclusive information society.
